

ORMESA®

• MADE IN ITALY SINCE 1980 •

BIRILLO

Emotions in motion.

Birillo by Ormesa is a **walker for children** with disabilities designed to allow autonomous movement in sitting position.

Its **peculiar shape and bright colors** characterizing the **self-extinguishing upholstery**, make it a fun and stimulating aid and a valuable tool for rehabilitation activities.

PRODUCT TESTED BY
TÜV BERLIN

PRODUCT REGISTERED **FDA** USA

PRODUCT MARKED **CE**

Modeled on you

Available in 4 sizes

Birillo is an extremely helpful aid for **the exploration of the surrounding environment**, which instantly shift from being a visual and static space to a territory of discovery. **Through Birillo, the child can enrich his wealth of experiences and increase his cognitive and relational repertoire, increasing body and space awareness.**

With Birillo, safety and fun go hand in hand. The triangular shape of the seat gives stability to the pelvis and trunk, favoring a functional position to the use of the lower and upper limbs. Thanks to these features, it **stimulates the correct posture of the child without inhibiting the rotation of the trunk**, favoring the management of movement through the arms. The correct posture prevents deformities and favors the generation of motor schemes, essential for a **rich and meaningful interaction with the physical and social environment.**
