BATHROOM SOLUTIONS

A wheelchair or commode chair can cause many problems. Even the lowest brim may make rolling difficult and require heavy lifting from the nursing staff. Excellent ramps and tiles provide better accessibility and can be fitted to any bathroom.

Solutions with Excellent ramps and tiles are fast and economic and do not require any conversion of the bathroom.

Example of a typical shower unit. A shower tray like this one will be filled up with tiles and if necessary fitted with a small ramp.

Example of a typical shower unit. A shower tray like this one will be filled up with tiles and if necessary fitted with a small ramp.

THRESHOLD SOLUTIONS

Access to the bathroom and the other rooms of a house is a necessity, and for this we offer a range of solutions. We can provide ramps not only in various heights and widths, with and without corner, but also in a number of different colours.
